PROFESSIONAL SUMMARY

Senior Backend Engineer and Team Lead with 9+ years of experience building scalable microservices and data platforms. Currently leading engineering efforts for IBM WatsonX.Data, specializing in distributed systems, cloud-native architectures, and data engineering pipelines. Strong expertise in Java, Spring Boot, Kafka, and AWS, with hands-on experience in NLP and analytics systems.

TECHNICAL SKILLS

- 1 Languages: Java, Python, JavaScript
- 2 Frameworks: Spring Boot, Dropwizard, Django
- 3 Architecture: Microservices, Distributed Systems, Event-driven Architecture
- 4 Cloud & Platforms: AWS (EC2, RDS), Snowflake
- 5 DevOps: Docker, Kubernetes, Jenkins, OpenShift, Ansible, HashiCorp Vault
- 6 Messaging: Kafka, RabbitMQ
- 7 Databases: MongoDB, PostgreSQL, MySQL, Oracle, Redis, Snowflake, Elasticsearch
- 8 Data Engineering: ETL Pipelines, Data Warehousing, NLP, Machine Learning
- 9 Tools: MuleSoft, NetSuite, Salesforce Commerce Cloud

PROFESSIONAL EXPERIENCE

Senior Software Engineer / Team Lead – IBM (WatsonX.Data) | Dec 2023 – Present

- 1 Leading backend engineering for data platform services
- 2 Designing and scaling microservices for distributed systems
- 3 Driving architecture decisions for cloud-native applications
- 4 Mentoring engineers and leading Agile delivery
- 5 Improving system reliability and performance

Senior Software Engineer – Litmus7 | Aug 2019 – Nov 2023

- 1 Developed scalable microservices using Java and Spring Boot
- 2 Built enterprise data pipelines with MuleSoft, Python, AWS
- 3 Implemented Snowflake-based data warehousing solutions
- 4 Automated ETL workflows and reporting systems

Software Engineer – Lulu International Exchange | Jun 2018 – Aug 2019

- 1 Developed backend microservices for financial systems
- 2 Led digital transformation initiatives
- 3 Built APIs for high-volume transaction processing

Senior Software Engineer – Dexlock Technologies | Jan 2015 – Dec 2016

- 1 Developed NLP and ML backend systems
- 2 Led product engineering efforts
- 3 Designed scalable data pipelines

Software Engineer – Instio | Jan 2017 – Jun 2018

- 1 Built microservices and database solutions
- 2 Developed NLP-based analytics systems

Associate Software Engineer – Solutions Infotech | Feb 2013 – Jan 2015

- 1 Developed Android applications and backend services
- 2 Delivered technical training programs

KEY PROJECTS

Unified Data Platform: Built ETL pipeline using Python, MuleSoft, Snowflake; automated data workflows

NLP Analytics System: Developed NLP models using Stanford CoreNLP for sentiment analysis

CERTIFICATIONS

- 1 MongoDB for Java Developers (MongoDB University)
- 2 PG Diploma in Advanced Software Technologies – NIELIT

EDUCATION

B.Tech – Computer Science and Engineering, Cochin University of Science and Technology
